CPS109 Lab 9

Included with this lab are six Python files:

q91.py
q92.py
q93.py
q94.py
q95.py
matrices.py

q91-q95 contain function skeletons and unit tests, just like those you worked on during the midterm. Each of these involves solving a problem on a matrix (list of lists). The file matrices.py contains several helper functions for creating and printing matrices, and must be in the same folder as the question files when testing.

Submit your completed functions, q91-q95, on D2L under Lab 9.
